Optical Distribution Frame Mini ODF

Description

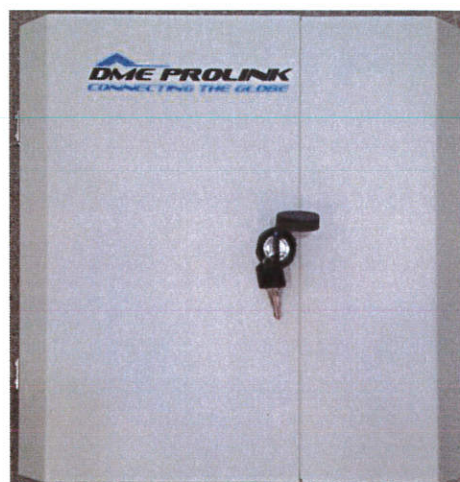

DME PROLINK's Mini ODF is an indoor distribution frame for fiber counts up to 48 Fibers.

This closure offers patch & splice functionality in a configuration supporting demarcation, in which there are two separate independently secured chambers. This allows splicing access to the installation teams and independent access to the terminate/patching function for the operations teams.

Features & Benefits

- ✓ 48 Fiber capacity terminate/splice
- ✓ Accommodates Splicing and/or Direct Termination.
- ✓ Top or bottom cable entry.
- ✓ Durable Powder-coat finish.
- ✓ Cable and grounding kits are available.
- ✓ Separate locks & keys
- ✓ Includes adapters & splice trays
